

Directory Of Resources For Comprehensive Planning In Wisconsin

Developed By
The Department of Administration—
Division of Intergovernmental Relations
and
The Wisconsin Land Council—
State Agency Resource Working Group

Photos by Beth Miller and Zane Williams

October 2003

see www.doa.state.wi.us for latest revisions

Acknowledgments

This directory was developed by the Wisconsin Department of Administration—Division of Intergovernmental Relations, and the Wisconsin Land Council State Agency Working Group (SARWG). The intent of this directory is to facilitate comprehensive planning in Wisconsin by increasing awareness of and access to state agency data sets, plans, reports and program information. The intended audience is all persons participating in local comprehensive planning, including planners, local elected officials and staff, citizens, developers, businesses, farmers, attorneys and others. The development of this directory is consistent with the State Agency Resource Working Group statutory charge of providing technical assistance for comprehensive planning.

State Agency Resources Working Group (SARWG) Members

Jason Helgerson, Chair
Department of Revenue

Greg Landretti, Vice Chair
Department of Revenue

Sandy Beaupre,
Department of Transportation

Paul Benjamin,
Department of Agriculture, Trade and Consumer
Protection

Mike Blaska,
Department of Administration--
Division of Intergovernmental Relations

Richard Dexter,
Wisconsin State Historical Society

Rob Nurre,
Board of Commissioners of Public Lands

Blair Kruger,
Department of Revenue

Tanace Matthiesen,
Department of Transportation

Vacant,
University of Wisconsin—Madison

Anna Haines,
University of Wisconsin—Extension
Center for Land Use Education

Dreux Watermolen,
Department of Natural Resources

Kathy Heady,
Department of Commerce

Department of Administration-- Division of Intergovernmental Relations SARWG Staff

Charyn Grandau
Planning Analyst
(Primary author)

Erich Schmidtke
Planning Analyst

Sarah Kemp
Planning Analyst

Jerry Sullivan
GIS Specialist

How to Use This Directory

This directory is organized around the nine comprehensive plan elements. Additional sections have been included that relate to comprehensive planning. Sections are broken down into subheadings of Guides, Plans, Data Sets, and Programs. These are defined below:

- **Guides** are written documents that provide information on how to approach some aspect of the comprehensive planning process for counties, planners, citizens, business people, local government staff, elected officials and others. Some are broad in scope, offering advice on planning in general, while others are limited to a specific topic.
- **Related Plans** are documents generated by county or regional authorities, or state and federal agencies that could affect a community's plan, such as transportation and economic development plans.
- **Data Sets** can be either spatial or tabular data. Spatial data may be in vector (point, line and polygon), raster (grid cell) or image (pixel) format. Some examples include digital orthophotographs, shapefiles and geocoded addresses. Spatial data may be viewable from an on-line map server, available for download from a web site, or available only by submitting a request to an agency. Another category of spatial information includes static maps, in digital format or hardcopy. Tabular data can be spatial (e.g., attribution for spatial data) or non-spatial. Some examples include computer databases or spreadsheets.
- **Programs** are resources to assist counties, cities, villages and towns in the implementation of their comprehensive plans. Information on funding, grants and other assistance would fall under this heading. Although there may be other programs available to communities, the focus of this directory is to provide information on state and federal programs that assist local governments in the development of their comprehensive plans.

To use this directory you can simply press the **Bookmark** tab on the left-hand side of the document and then scroll through the **Table of Contents** until you reach the section you are interested in, such as the **Land Use** or **Transportation Element**. To go directly to a selected section **Click** on the heading title. Information for each section is arranged in tables (see example table below). The left-hand column of each table provides a title or a description of a planning resource. The center column provides an Internet hyperlink to where that information can be found. Sometimes you will be required to navigate a website in order to find exactly what you want.

When an Internet link is not available, contact information is provided in the center column. The right-hand column shows the agency that is the source of the information. Resources that pertain to more than one element have been listed multiple times. Abbreviations for agency sources are contained in Appendix A. Further contact information can be found in the section titled **Contact Information for State Agencies**.

If you have any problems using this document, or if any links do not work, please contact the Department of Administration—Division of Intergovernmental Relations at www.doa.state.wi.us
